

# Polycom® SoundStation VTX 1000™ with VSX™ 7400 or VSX 8400 Integration

## The world's first integrated wideband conference phone and video solution.

Video conferencing is now as easy as making a phone call! With the integration of the revolutionary SoundStation VTX 1000, VSX 7400 and VSX 8400 users can replace their video system microphones with Polycom's award-winning SoundStation VTX 1000 conference phone.

This unmatched solution provides a familiar user interface to easily initiate video calls, allows users to speak naturally from up to 20 feet away from a microphone and still be heard clearly on the far end, and reduces cords and clutter to the conference table. Plus, the SoundStation VTX 1000 can still be used for voice-only conference calls. And, since the VSX series video conferencing systems and SoundStation VTX 1000 all support wideband audio, point-to-point video and voice calls automatically go into wideband mode providing crystal-clear voice quality. You'll think everybody is in the same room!

### SoundStation VTX 1000 with VSX 7400 or VSX 8400 Features and Benefits

Ease-of-Use	<ul style="list-style-type: none"><li>• Video conferencing is now as easy as making a phone call – with the user friendly SoundStation VTX 1000, making a video call is a snap</li></ul>
